http://www.w3.org/DOM/

- http://www.w3.org/DOM/

- The W3C Document Object Model (DOM) is a platform and language-neutral interface that allows programs and scripts to dynamically access and update the content, structure, and style of a document

The W3C DOM standard is separated into 3 different parts:

1. Core DOM - standard model for all document types

2. XML DOM - standard model for XML documents

3. HTML DOM - standard model for HTML documents

What is HTML DOM?

- The HTML elements as objects

- The properties of all HTML elements

- The methods to access all HTML elements

- The events for all HTML elements

HTML DOM

- HTML DOM methods are actions you can perform (on HTML Elements).

- HTML DOM properties are values (of HTML Elements) that you can set or change.
